ML2023Spring HW5 Report

<CSIE> <許軒輔>

<410985014>

Public Score	Private Score
0.82200	0.82000

The methods I used to pass the strong baselines include:

1. I changes some parameter : self.max_paragraph_len = 350, self.doc_stride = 300, train_batch_size = 8
2. Data processing : to solve some problem when the word doesn't stick together or with wrong place
3. I use 3 epochs and decrease the learning rate to 1e-5
